

# Shuttle Services

Many hikers of the Lost Coast Trail choose to park their vehicle at one trailhead and be shuttled via local transport providers either to or from the opposite trailhead. In order to legally provide transport for hire on public lands, shuttle service providers must be issued a Special Recreation Permit from the Bureau of Land Management (BLM). This permit ensures that the provider is knowledgeable of BLM's regulations and requirements for hiking and camping in the King Range National Conservation Area (NCA), and has the proper insurance for transporting people.

NOTE: If you would like a shuttle between trailheads, then you must call one of the providers to schedule a pick-up date, time, and location. Do NOT wait until you are at a trailhead to call a provider. Please call a provider before your trip or you may need to alter your trip itinerary.

The following individuals and/or organizations have been issued a permit for the purpose of transporting people on public land in the King Range NCA:
